MEDCOENERGI EGMS Results & 1H16 Financial Results

Jakarta, 30 September, 2016 – Today PT Medco Energi Internasional Tbk ("MedcoEnergi" or the "Company") held an Extraordinary General Meeting of its Shareholders ("EGMS") with two agenda items. The first item approved was the acquisition of 50% of PT Amman Mineral Investama which will indirectly control an 82.2% interest in PT Newmont Nusa Tenggara (the "Acquisition"). The second agenda item approved was a capital increase through a limited public offering with preemptive rights to shareholders ("Rights Issue").

The Acquisition will add significant shareholder value by giving access to a world class operating facility at Batu Hijau with proved reserves of 2.6 billion lbs of copper and 2.7 million oz of gold and future access to discovered undeveloped reserves of 12.9 billion lbs of copper and 19.7 million oz of gold. The Acquisition will add scale to the Company's equity and investment portfolio, and will materially elevate the revenue contribution from non-energy sectors.

Through the Rights Issue, the Company will raise fund the equivalent of approximately US\$ 150 million. The proceeds will be used to repay maturing debt and to fund capital expenditures. Post Rights Issue, the Company will have a stronger capital structure to support its expanded activities.
